

Class Activity Solution

Higher-Order Functions

Write a function (using `mapcar`) that replaces the number 3 in a list with the number 6

```
(defun my-replace (x)
  (cond ((equal x 3) 6)
        (T x) )
)

(mapcar #'my-replace '(1 2 3 4 5 6))

'(1 2 6 4 5 6)
```
