

Reading Response 3

Due IN CLASS Tuesday, 17 April

Handout R3
CSCI 334: Spring, 2012

Readings

Please read and write a short response to the following paper. Hand in the response *in class* on the due date. Responses need not be longer than one-half to three-quarters of a page. Your response should address the general questions asked below, as well as anything you found particularly interesting in the article.

1. (15 points) C++

Read the excerpts from “The Design and Evolution of C++” by Bjarne Stroustrup.

Contrast the design goals to those of Smalltalk? What is different? What is the same? What is the intended use of C++, and how does that influence the design?
